ONLINE SEARCH IN ARCHIVE OF THE JABOTINSKY INSTITUTE

SEARCH

You may search using one word or a group of words, for one or more material types. Your search value may be one word or a group of words. It is possible to connect search values using Boolean operators: **"and",** "**or**", "**and not**", "**w/N**".

For instructions on using Boolean operators, see the section **Boolean Operators**.

You may search for several types of materials simultaneously. Select one or more types of material from the list of material types. Search for all material types related to your search by selecting "**Select All**". Cancel your choices by selecting "**Clear Selection**".

BOOLEAN OPERATORS

You may use Boolean Operators (**and**, **or**, **and not**, **w/N**) to construct a complex search:

and:

Jabotinsky and Betar will return results in which those words appear (not necessarily adjacent).

or:

Jabotinsky or Betar will return results in which at least one of the words appears.

and not:

Jabotinsky and not Betar will return results in which Jabotinsky appears and not Betar.

w/N:

Jabotinsky w/1 Zeev This proximity operator defines the maximum distance between the two words that are being searched. Using this operator will return results: **Jabotinsky Zeev** and **Zeev Jabotinsky**. Use this operator when searching for names of individuals.
